Floods caused rivers to swell, leading to breach in embankments at several places like in the Madhubani District of Bihar.

Planning and Coordination meetings were set up on disaster preparedness to cope up with the situation in Madhubani amidst COVID scenario.

A document on disaster preparedness and response was drafted for supporting the disaster team officials.

Field-level workers like ANM, ASHA and ASHA facilitator were orientated on flood preparedness and response.

ASHA and ASHA facilitator visited the flood-prone area during their regular House to House visits.

District Health team visited the flood-prone area to monitor the quality of care and provide supportive supervision in the COVID times.

Primary Health Care doctor demonstrated the use of Zinc to ANM, ASHA and ASHA facilitator in Madhubani.

Community meetings were conducted on flood preparedness and response.

Bleaching powder was sprayed in every corner by the health workers in the flood-affected area of Madhubani.

The pregnant women underwent routine check-ups in the flood-prone area without any delay.

Field-level workers briefed the villagers on Infection Prevention and Control practices in flood prone areas of Madubani District.
