

Assam Community Surveillance Programme

North East Region

unicef  for every child

On 7 March 2020, the State of Assam launched a Community Surveillance Programme to screen the cases of Severe Acute Respiratory Infections (SARI), Influenza Like Illness (ILI), Malaria, Dengue etc.

Teams of Accredited Social Health Activists (ASHAs), Auxiliary Nurse-Midwives (ANMs), Multipurpose Workers (MPWs), Medical Officers (MOs) and Lab Technicians (LTs) worked with an aim to reach 28,000 villages, covering the entire 3 crore population.

The Assam Community Surveillance Programme (ACSP) teams waded through floodwaters to reach various villages and hard to reach areas.

On the first day, the ASHAs visited houses and completed line listings.

On the second day, the MO visits and verification of lines were completed.

On the third day, LT visits for sampling were done.

Health workers visited houses and helped people to identify minor flu cases.

The teams were successful in reaching 1.98 crore population across 21,499 villages.

753,459 people were diagnosed with symptoms, out of which, 20,832 people had fever.

Assam Community Surveillance Programme

Government of Assam has taken a pro-active step for conducting Community Surveillance Programme at Village level across the state

- In view of the current Covid-19 outbreak and to further check its spread in the community, our health workers will visit your houses to identify minor flu like cases/respiratory infections.
- It's our earnest request to all to co-operate with our health workers and provide them with specific health details while they visit your homes.
- Let us make Assam Community Surveillance Programme successful & fight against COVID-19 together
